Company Introduction

Cahaya Chia Port Klang Sdn. Bhd. and its group of companies are leading manufacturer of yarns, threads & mops **in Malaysia since 1976**. Presently, the factory covers a total area of over 150,000 sq.ft. with a total work force of about 250 employees.

The group's core business involves in the Spinning, Plying and Twisting of Coarse Counts Yarns for industrial Yarns & Threads, Twines and Strings, Filler Cords (Garabo Yarns), etc as well as making of various types of sewing threads for many industrial uses.

With latest complete lines of advance mops making machineries we also spin and make highly absorbent, strong and lasting mop yarns and mop heads for household and industrial floor mopping, polishing and cleaning.

Currently, our products are exported to Europe, Australia, Africa, Middle East, South America and most countries in Asia, etc. Importantly, we always do our level best to safeguard all of our customer's interest and to provide competitive prices, consistent quality and cost effective goods as well as our personal and friendly service to all of them.

Since 1981 in Malaysia,

NANMU have been producing all types of sewing yarns & threads, strings, filler cords and twines to suit many industrial needs.

100% Spun Polyester and Spun Vinyon (Kuralon) Bag Closing (Sack) Sewing Threads

Quality / Properties :

- Universally acclaimed Bag Closing Thread, highly recommended for industrial use. Attributable to its high tensile strength, high resistance to alkali, acid, salt, ultra violet radiation, heat & abrasion. Do not deteriorate much when exposed to normal climatic condition.

Standard Specification :

- A) NE 20/6 ply, NE 12/4 ply & NE 12/5 ply
- B) Tensile Strength (NE 20/6) approx. 6.5 kgf, etc.

Packaging Size :

- A) From 1000 meters length onwards
- B) From One(1) kilo to Ten(10) kilo
- C) From 150 grams to 250 grams
- D) Other length or weight of threads are also available upon request

We provide **quick & prompt** delivery
We welcome **big & small** orders.

Bag Closing Thread : USAGE

- Commonly used for all brands of bag closing machines. (Stationary & Portable)
- Sewing of multi-wall paper bag, PP woven bag, jute, gunny, hessian and bulk bag (FIBC), etc.
- For packing fertilizers, feedmeals, grains, cereal, flour, sugar, cement, lime, chemical, resin, geotextile, charcoal etc.
- Binder (Reinforced Material) for making filter fabric, canvas, ropes, webbing, core thread for zippers, etc.

Crepe Paper Tape : USAGE

- Commonly used to sew together with Bag Closer Thread on paper bag.
- The paper is creped which make it highly resistant to tearing and also provide cushioning effect upon pressure applies.

**FIBC Bag / Jumbo Bag****Polyester Twine****100% Cotton Twine**

Polyester, Nylon, Rayon & PP Filament

Used in hose/pipe reinforcement, cable ripcord/fillers, optic cable binder, footwear (cupsole), leatherwear, quilting, upholstery, cushions, car seat, sling, webbing, belt, butcher twine, toys for pet, tea bag sachet, treasury tags, etc.

**Ripcord****Hose Reinforcement**

Butcher Twine

Butcher's Twine is essential during preparation for cooking meat. It helps to retain the shape and also juices from flowing out where it will affect the flavors. It also helps to maintain the stuffing to stay in place and not overflowing during meat expansion during cooking.

Twine Specification :

- 600Tex - 2500Tex
- From 150 grams up to 2.0 kg

Twine (Polished / Unpolished)

- Twine can be made of Poly/Cotton, Sisal, Jute, Flax, PP and etc.
- For general tying purposes such as :-
Tying parcels, envelopes, boxes, files, flags, banners, tobacco, currencies notes & furniture edging, etc.
- Available in many sizes and make-up, ie:-
Balls, rolls, cones or in little hanks, etc.

Filler Cord (Garabo Yarn)

- Coarse count yarn for industrial bags
- Acts as filler which fills up holes punched by needle during stitching
- Prevents minute fine powdery content from seeping out of the needle holes
- Acts as underlay which provides cushioning effect during stitching of paper bags
- Commonly used for paper bags

Flax / Jute Twine

Flax & Jute twine is made from the fibres of brilliantly resourceful plant. It is 100% natural, soft, durable and strong.

Flax products are widely used in plumbing industry, agriculture use, craft application, parcel strings, etc.

- Mop yarn are produced from blended materials of virgin and regenerated waste fibers of cotton, polyester, acrylic, rayon & etc.
- Available Mop Yarn Package: -
 - In Roll Form of 20KG
 - Cut into Length
 - In Cone of 5KG

Since 1979 in Malaysia,
ARONA have been spinning & making all kind of Mop Yarn & Finished Mop for household & industrial usage.
